Laboratory of Excellence

Inter-Disciplinary Research Facility on Human-Environment Interactions

Call for research projects 2022

DRIIHM LabEx call for research projects 2022 - ANR-11-LABX-0010
Inter-Disciplinary Research Facility on Human-Environment Interactions
2021 October 5th - 2021 December 5th

Calendar

Opening Date: Tuesday october 5th, 2021

Applications are to be submitted before Sunday, december 5th, 2021 (24h00 Paris local time)

Results of call for research projects: January 2022

CONTACTS

For further information, please contact:

Corinne Pardo – Scientific coordinator of LabEx DRIIHM
corinne.pardo(at)univ-amu.fr

Technical support:

Mathieu Massaviol – Engineer informatic project of LabEx DRIIHM
Mathieu.massaviol(at)univ-amu.fr

For specific question regarding one OHM:
Please contact the concerned OHM leaders

SUMMARY

1	Context and domains covered by the DRIIHM.....	4
1.1	Context.....	4
1.2	Features of the call for projects.....	4
2	DRIIHM LabEx call for research projects.....	6
2.1	A call on the themes of OHM.....	6
2.2	A call on the interOHM thematic.....	6
2.3	Call 2020 for Postdoctoral fellowships.....	6
2.3.1	<i>Who's eligible ?</i>	6
2.3.2	<i>Submitting post-doctoral project</i>	6
3	Submitting a research project.....	7
3.1	Who can apply ?.....	7
3.2	Online submission.....	7
3.3	Obligations of funding recipients.....	7
3.3.1	<i>Administrative obligations</i>	7
3.3.2	<i>Scientific obligations</i>	8
	<i>Acknowledgements</i>	8
	<i>Data - Storage and archiving</i>	8

1 CONTEXT AND DOMAINS COVERED BY THE DRIIHM

The Human-Environment Observatories (OHM in French, 13 in operation¹) were created in 2007 by the CNRS Institute of Ecology and Environment (INEE) to conduct observations, experimentations and modelling on highly anthropized ecosystems in an integrative approach to environmental sciences.

Since 2012, DRIIHM (Inter-Disciplinary Research Facility on Human-Environment Interactions) is a national LabEx, supported by French national research agency (ANR), that brings together, organises and leads the OHMs. DRIIHM LabEx has been renewed for 5 years (2020-2024).

1.1 Context

All the OHMs were created to tackle the very great complexity of these Single Ecosystems and the socio-ecological crises developing there. This requires a very high degree of inter-disciplinarity between all the environmental sciences (ESs) – earth, life, human and societal – which inform each other to build a global ecology through this joint, interactive approach. The research results are made available not just to scientists but also to economic, political and social actors in order to maximise their potential and help build durable and sustainable development.

The OHM conceptual framework is based on a three building blocks that shapes an identity and robust operationalities: **(1) the social-ecological framework** is the distinctive environment in which the OHM takes place; **(2) the disrupting event** refers to the socio-environmental crisis that lies at the heart of the problem to which the OHM wants to bring understanding and that it wants to help resolve. It establishes a before and an after, serving as a benchmark for assessing the new dynamics; and **(3) the focal object** is the product of combining the first two elements. It is shared by everyone as a research target, enabling all the ESs to discuss the same object, thereby promoting the emergence of this new inter-disciplinarity that responds to new questions.

1.2 Features of the call for projects

This call is intended to encourage studies in the environmental sciences fields and specifically on priorities of OHM. These domains are listed below and can be treated in the framework of one or more OHM.

- Retroaction of socio-ecosystems on global change
- dynamics of biodiversity and temporal scales
- from anthropization to artificialisation of environment
- Studies of new biomes,
- Environment and health, health ecology,
- Chemical ecology and ecologic chemistry, ecotoxicology,
- contaminants and contaminations,
- Environmental sustainability and uses
- Environmental Amenities and economic approaches,

¹The 13 Human-Environment Observatories: Provence coalfield (PACA, France), Estarreja (Portugal), Pyrenees-haut-Videssos (Midi-Pyrenees, France), french mediterranean coast (Languedoc-Roussillon, PACA, Corse, France), Nunavik (Quebec, Canada), Oyapock (French Guyana), Tessekere (Senegal), Bitche County (Lorraine, France), Pima County (USA), Caribbean coast (Guadeloupe, France), Rhone valley (Rhône-Alpes, Languedoc-Roussillon et PACA, France), Patagonia-Bahia Exploradores (Chile) et Fessenheim (Haut-Rhin, France).

- Efficiency of Public policies and sustainable management of territories.

The main purpose of this call is intended to encourage teams to explore new avenues of research, both themed and methodological approach, to implement them in the context of Human-Environment observatories works.

The LabEx DRIIHM 2020 call for research projects includes:

- a thematic OHM component (see [Chapter 2.1](#)),
- an inter-OHM component - (see [Chapter 2.2](#)).

All projects toward OHM or inter-OHM are funded for a period of **two years**.

The proposal can be considered in coordination with existing research programs or as an emerging project; it could serve as a basis for further developments.

Projects submitted may be disciplinary, multidisciplinary or interdisciplinary.

Submitted projects shall concern theoretical research or must be organized around an action or an operational research.

Comparative approaches will be appreciated.

We also encourage the submission of proposals that cope with societal demands and their answers as diagnosis, ecological engineering, expertises or decision supports.

The Labex policy engages teams in a dynamic of knowledge sharing and communication towards civil society and particularly the younger generations. In this context, the OHMs and the LabEx DRIIHM will pay particular attention to projects that propose one (or more) intervention(s) (workshop, presentation, conference...) in a school present on the territory of the OHMs.

2 DRIIHM LABEX CALL FOR RESEARCH PROJECTS

2.1 A call on the themes of OHM

This component consists of eleven independent consultations, issued and managed individually by each observatory. If the proposal refers to several observatories, the applicant must inform each OHM and must ask each of them for funding via the entry form. Applicants are reminded that each OHM has its own priorities and funding; to familiarize yourself with these priorities, please refer to the links below.

Applicants (Principal Investigators) must register on the DRIIHM online system (<https://www.driihm.fr/en/registration>) prior to submitting their first proposal. Proposals will be submitted electronically at <https://www.driihm.fr/en> in the manner described in the previous paragraph (3.2. Online submission)

Call for projects 2022 - [OHM Bitche County](#)

Call for projects 2022 - [OHM Caribbean coast](#)

Call for projects 2022 - OHMi Estarreja ([French Version](#) / [Portuguese Version](#))

Call for projects 2022 - [OHM Fessenheim](#)

Call for projects 2022 - OHM French Mediterranean Coast

Call for projects 2022 - [OHM Haut-Videssos](#)

Call for projects 2022 - [OHM Nunavik](#)

Call for projects 2022 - [OHM Oyapock](#)

Call for projects 2022 - OHMi Patagonia-Bahaia exploradores (coming soon available)

Call for projects 2022 - [OHMi Pima County](#)

Call for projects 2022 - [OHM Provence coalfield](#)

Call for projects 2022 - [OHMi Tessekere](#)

Call for projects 2022 - [OHM Rhone valley](#)

2.2 A call on the interOHM thematic

This call for projects has its own funding. This is a non-thematic call for proposal which nevertheless must involve several Human-Environment Observatories.

Applicants (Principal Investigators) must register on the DRIIHM online system (<https://www.driihm.fr/en/registration>) prior to submitting their first proposal. Proposals will be submitted electronically at <https://www.driihm.fr/en> in the manner described in the previous paragraph (3.2. Online submission)

BE CAREFUL! Before submitting any interOHM project, the researcher must contact the directors of the OHMs concerned.

Applicants can attach any PDF documents.

3 SUBMITTING A RESEARCH PROJECT

3.1 Who can apply?

The proposal can be submitted by a french scientist from an Public Scientific and Technical Research Establishment (EPST in french) members of the LabEx, or by foreign scientists from international OHM (Tessekere, Estarreja, Nunavik, Pima County, Patagonia) or by all foreign scientists with french scientific partners (in concertation with the OHM leaders concerned).

An applicant (principal investigator/project director) may submit multiple applications for IRDHEI funding, provided the proposed projects have different objectives.

3.2 Online submission

Proposals will be submitted electronically at <https://www.driihm.fr/en>

The applicant (Principal Investigator) must register on the DRIIHM online system (<https://www.driihm.fr/en/registration>) prior to submitting information for their first proposal.

Register for an online account : three phases to the submission

At first : Register for an online account on <http://driihm.fr/en/registration>, create your login (username) and password. After registering you have to **confirm your registration** by clicking on a link sent to you by email.

Secondly : Click on « [Enter a Research Project](#) » ; in your space, select language by clicking the french, british or potuguese flag. Fill out form and Check the box check the box that you agree with the observatories' charter. Save and Close your submission.

Subsequently : On your account, you visualize the abstract of your proposal. Click on « Edit icon »  Now, you have to fill out the budget form. Save and Close.

Only the applicant can see and modify its proposal from its submission until midnight, sunday december 5th, 2021.

3.3 Obligations of funding recipients

The funding recipients commit themselves to the following.

3.3.1 Administrative obligations

For a period of one month following the announcement of the winners, the teams undertake to provide the APR manager with the necessary information to make the funding obtained available. If these formalities are not fulfilled within one month, LabEx DRIIHM reserves the right to reallocate the corresponding funding.

The expenses incurred in the context of the winning projects must fall within the scope of the eligible expenses of DRIIHM Labex (see DRIIHM Financial Guide online on the LabEx website and sent to all

APR winners) and will be justified annually in February to the DR16 accounting Department, via the local delegation of the winning unit.

Some major points are already mentioned here:

- capital expenditure **is not eligible**;
- expenditure on "small tools" is eligible up to €4,000 (as defined by the ANR);
- the service delivery are eligible but their amount must not exceed 30% of the total budget allocated;
- internship bonuses are eligible but must be requested at the time of project submission.

3.3.2 Scientific obligations

Within two years after obtaining the credits and before any submission to a new DRIIHM call for research projects, the funded projects will be subject to:

- an oral presentation at the symposium of OHM to which the project referred,
- a brief report given to the OHM(s) concerned in the form of a summary sheet (4p.), the outline of which will be available on the DRIIHM website and will also be sent to you by the OHM Director.

Acknowledgements

The winners undertake to publish within two years of this call at least 1 article in a peer-reviewed scientific journal. Each scientific partner in the project undertakes to mention the OHMs and DRIIHM in all publications or communications of its research results in the form of:

"This work was (co)funded by the LabEx DRIIHM, French programme "Investissements d'Avenir" (ANR-11-LABX-0010) which is managed by the ANR".

The LabEx DRIIHM and its address can also be recalled at the header of the article (researcher's address) in this form:

LabEx DRIIHM (Programme "Investments for the future": ANR-11-LABX-0010), INEE-CNRS 3 rue Michel-Ange, 75016 Paris.

For oral communications and posters, it is requested to affix the DRIIHM logo next to those of the Programme d'Investissement d'Avenir (PIA) and the CNRS (available online on the DRIIHM website).

Data - Storage and archiving

In agreement with the OHM Charter, the storage and archiving of scientific information are two of the objectives of OHMs. Winners must therefore accept the principle of transmitting their metadata via a metadata sheet on the OHM and DRIIHM sites; the DATA DRIIHM group will support each of the researchers in this task.

As in any observatory, the data are intended to be transferred, after valuation by their author, directly to the OHM's information system or, failing that, to the DRIIHM LabEx.

Moreover, all the publications and communications relative to the winning projects must be deposited in HAL, at least their reference if you cannot diffuse widely the document itself. So that these valuations appear in the DRIIHM and OHM collections, take care to follow the recommendations of key words citation and of the ANR project " LabEx DRIIHM : ANR-11-LABX-0010 ". You will find these recommendations on the home page of our HAL collection: <https://hal.archives-ouvertes.fr/LABEX-DRIIHM>.
